Excellent. Rod Zion with the Corps of Engineers may accompany me today. It's an opportunity for Rod to get underground in the mine.

Hello Ed

I contacted Gary at the CPT and made him aware of our diversion system test. I will give Gary a call when we start to dismantle the dam so they can be prepared.

Thank you
Brian Harden

Brian/Mark:

I'm sure you guys have already done so but I just want to make sure the CTP operators are aware of the intended diversion system test and the duration of flow cessation. I know they will have an interest knowing that dam dismantling will be done in a iterative process to prevent a slug flow from slamming the plant.

Please advise,

Ed Moreen
